

Candidate Screening Report

Senior Platform Engineer

Generated 2026-08-07 06:30 UTC by abhikdey072@gmail.com

This is an automated screening aid, not a hiring decision. It is based solely on information extracted from the submitted resume and should be reviewed by a human recruiter alongside the full application. Do not use it as the sole basis for rejecting or advancing a candidate.

Role Requirements

Requirement	Detail
Required skills	Python, Kubernetes, Terraform, Go
Preferred skills	None specified
Minimum experience	8 years
Education	Not specified

Screening Overview

Metric	Value
Candidates screened	2
Average match score	0.45
Consider	2

Executive Summary

A pool of 2 candidates was screened for the Senior Platform Engineer role, yielding an average match score of 0.45. Both candidates matched on Python and Kubernetes while missing Terraform and Go, resulting in identical top rankings and 'Consider' recommendations across the board.

Match scores are computed arithmetically from skills, experience, and education against the stated requirements. They reflect resume-to-requirements fit only.

Candidate Ranking

Rank	Candidate	Score	Recommendation	Missing required skills
1	Abhik Dey	0.45	Consider	Terraform, Go
1	Abhik Dey	0.45	Consider	Terraform, Go

#1 — Abhik Dey

Field	Value
Email	abhikdey072@gmail.com
Match score	0.45
Recommendation	Consider
Resume file	Resume.pdf

Why this recommendation

Match score 0.45 falls between the consider threshold of 0.45 and the recommend threshold of 0.65.

Summary

The candidate demonstrates relevant technical skills such as Python and Kubernetes, which are utilized in their projects like the AI Resume Screening Platform. However, they lack documented experience with Terraform and Go, resulting in a moderate match for the Senior Platform Engineer position.

Matched skills

- Python
- Kubernetes

Missing skills

- Terraform
- Go

Strengths

- Demonstrated proficiency in Python and Kubernetes.
- Hands-on experience deploying containerized applications using Docker, Kubernetes, and GitHub Actions.

Areas of concern

- Lacks evidence of required skills such as Terraform and Go.
- No prior professional experience listed to demonstrate senior-level platform engineering background.

Risk factors

- Required technology Terraform is absent from all listed projects and skills.
- Required technology Go is absent from all listed projects and skills.

#1 — Abhik Dey

Match score	0.45
Recommendation	Consider
Resume file	resume.pdf

Why this recommendation

Match score 0.45 falls between the consider threshold of 0.45 and the recommend threshold of 0.65.

Summary

The candidate demonstrates strong foundational experience with container orchestration and backend development, featuring hands-on implementation of Kubernetes and Python in projects such as the AI Resume Screening Platform. However, the candidate lacks demonstrated experience with Terraform and Go, which are required for this Senior Platform Engineer role.

Matched skills

- Python
- Kubernetes

Missing skills

- Terraform
- Go

Strengths

- Demonstrated proficiency with Python and container orchestration tools like Kubernetes and Docker.
- Practical project experience building scalable microservices and implementing CI/CD pipelines with GitHub Actions.

Areas of concern

- Lacks experience and project evidence for required technologies Terraform and Go.
- Does not demonstrate prior professional experience in senior platform engineering roles.

Risk factors

- Absence of any listed project experience or skill mentions for required technologies Terraform and Go.
